

## EXECUTIVE DIRECTOR MESSAGE

Hello everyone,

As we near the end of the school year, I want to express my gratitude for your generous donations, which make our work possible.

Looking ahead, we're excited for our summer marketing programs, connecting vendors with NEISD teachers. We're also partnering with NEISD's Nutrition Services for the Summer Feast event on June 13 at Ed White Middle School.

Thank you to those who attended the recent State of the District Event. Your engagement is vital as we learn about important issues together.

Enjoy the warmer weather, and thank you for your continued support.

Warmest regards,

Katherine Rocha

## NEEF BRIEF

May 2024

### SPOTLIGHTING ...

At Longs Creek Elementary, Heather Carroll enhanced the STEM class with more robotics, in addition introducing audio and video equipment to create vibrant presentations.

Her students produced outstanding PowerPoint presentations, followed by green screen recordings of themselves discussing their projects. Two of her former fourth-grade students, who are now fifth-graders, Thomas Otte and Trevor Herring, created an incredible presentation similar to a TED talk about the solar system. Even adults could learn a thing or two from these budding astrophysicists!

We are genuinely grateful to Heather Carroll for pushing these young minds to explore beyond the K-5 Curriculum and taking learning to a new level.
